Letter of Introduction:

Hello,

I have a passion for designing experiences and would enjoy working as part of your multi-discipline design team to create new features and other cross-portfolio initiatives that support your products. At your convenience, I'd appreciate the opportunity to discuss my candidacy with you.

Throughout my studies at the University of Arkansas at Little Rock, I have developed an understanding of design principles in UI/UX and graphic design. You are welcome to view my portfolio samples at jcweathington.github.io/portfolio in which I demonstrate

- UI design deliverables including user flows, wireframes, and prototypes.
- Different ways to solve user problems and deliver user value.

Also, I have 10+ years of customer service experience that has refined my communication skills, thus making me a valuable member of a development team. My latest two positions are listed in my resume. You can find my resume attached.

I believe that I have a broad range of design skills and IT knowledge to help meet your initiatives and I would greatly appreciate the opportunity to learn from your design team. You are welcome to contact me. I will be available at your convenience.

Thank you for your consideration,

Josephine Aaron Weathington
