Dear Mr./Ms.,

I have a passion for designing experiences and would enjoy working as part of your multi-discipline design team to create new features and other cross-portfolio initiatives that support your products. At your convenience, I'd appreciate the opportunity to discuss my candidacy with you. You can find my resume attached.

Presently, I am majoring in Web Development & Design at the University of Arkansas at Little Rock (UALR). My expected graduation date is May 2023. Throughout my studies at UALR, I have developed an understanding of design principles in UI/UX and graphic design. You are welcome to view my portfolio samples at (www....) in which I

- Apply UI design deliverables including user flows, wireframes, and prototypes.
- Engaged with users to validate designs and capture feedback.
- Find different ways to solve user problems and deliver user value.

I believe that I have a broad range of design skills and IT knowledge to help meet your initiatives and I would greatly appreciate the opportunity to learn from your design team. You are welcome to contact me at 501.766.0635. I will be available at your convenience.

Thank you for your consideration,

Josephine Weathington
